We are astonished at the guilability of Prentice, to swallow the abundance of the low Fitch, who himself don't believe a single word of what he said.

Let A correspondent of the New York Theory recently visited General Hooker at Watertown, N. L., and said to him: "General Hooker, what so you think of the declaration made at Chicago, that the war against the rebells has thus far been a fallare?" His reply was in these words: "It's pretty much what might have been expected from the sort of propole assembled there, law't it?" His own opinion upon that point was pretty clearly appressed in another remark made by him to, the effect: "That it he Union armies did not strike snother blow, but simply held their present position, that rebellion was already toticong to the fall, and he spoke in terms of amazement, and certainly with no want of either directness or force, of the wheelm traitories, which he found so that Amazement has Complete Lieuwent traitories.

ANOTHER VEREAUX OFFORDS TO MCCLESS.

LAX.—The veteran General McCall is openly opposed to McCleillan. He is a Democrat of the old school, and a brave soldier. He knows McCleilan perfectly, and consequently is opposed to him. He was the Democratic candidate is r Congress in 1860, and shows a clear record, which he will preserve by the course he has adopted.

Lay There is a starting rumor in town to the effect that McCleilan will not vote for rendiction, nor Fendleton for McCleilan. One is so unequivocally for peace that he cannot vote for a candidate who receives his pay from the War Department, and the other, being "The Soldier's Friend," can exaculy be expected to endorse a man who is in every respect the soldier's enemy.

For The National Intelligency is indiguant that the late enti-slavery convention of Maryland allowed soldiers in the field to wole. These conservative organs, which have so lustily for McClellan would disfranchine any soldier in the field, while they would allow galvanised traiters in the Border States the right of sufrage.

ger If any of our readers will turn to Nier Register for 1814, and read the long ad-dress of the Harttord Convestion there pub-lished, he will find nearly every point there made against Mr. Madison's Administration and the war of that period which is now made by the Copperheats of this day against Mr. Lincoln's Administration and our present war. In default of that, let him refer to ent war. In default of that, let him refer to Benton's Debates of Congress, and read some of the spreches then uttered by the Pederalist leaders. He will find the same arguments, the same sppeals, the same invectives, and even the same physics and terms of expression that are now constantly assaulting our ears.
